WORLD WHEAT SITUATION.

(Condensed from the Monthly Letter issued by the Royal Bank of Canada.)

The recent spectacular rise in wheat prices has focused attention on the prospect of greatly reduced wheat supplies throught the world. Current estimates indicate a reduction of 340 million bu. in the crop in Continental Europe.

Returns from the U. S. show a further falling off as compared with the poor harvest of 1933; the crop is reported to be the smallest in 40 years.

The seriousness of the situation has been accentuated by the effect of the drought upon corn and other grains.

Altho the outlook has since improved under more favorable conditions, Canada experienced hot dry weather only in the season and returns will be much below the long time average.

World stocks of old grain are still heavy but it is anticipated that these will be substantially reduced during the coming season and that more normal conditions of demand and supply will be established.

The crop situation in the U. S.

is less promising than in any recent year. The total wheat crop is officially estimated at only 484 million bu. as compared with 528 million bu. in 1933, 744 million bu. in 1932 and a 5-year average production (1927-31) of 880 million bu. A crop of the size estimated for 1934 would be the smallest raised in the U. S. since the 428 million bu. crop of 1893.

The output indicated is substantially short of the current season's domestic requirements of 600 million bu. The crop last year also failed to meet home demands. Only twice during the last 44 years has the current year's harvest fallen below the quantity required for domestic consumption. Stocks of wheat on hand in the U. S. July 1, 1933, reached the record proportions of 393 million bu. These were reduced by last year's domestic demands and by exports. On July 1, 1934, these stocks amounted to about 285 million bush., and it is hoped the current season will see the carryover reduced to normal.

A Birthday Party.

A charming evening was spent on Friday, Aug. 17th, when about threescore ladies of St. Matthew's church (Missouri Synod) gave a surprise party in honor of Mrs. Emil Eberhardt, at the St. Matthew Parsonage. The occasion was the anniversary of the lady's natal day. Amusements and music helped pass a very pleasant evening. A dainty lunch was served. On leaving, each wished Mrs. Eberhardt "Many happy returns."

Saturday's Runaway.

Stony's regular monthly runaway occurred on Saturday, the 18th, just before noon, when a team of light bays which had been left standing in Tony Rosenberger's mill yard suddenly took a notion to travel. Starting south, and crossing the railway tracks, they left the wagon box on the hill by the Searle elevator. Pursuing their course at a fairly good clip, they shed the running gear to which they had been attached, down by ex-Mayor Donaldson's vineyard. On getting down to Bill Hatley's corner the equines turned west, and got to their accustomed feed lot with the neckyoke and most of the harness still intact. The owner secured a friend's team, and went back to collect the various articles sprinkled along the trail.

Harvest Jobs Rather Scarce.

While there has been a considerable demand for harvest help in sections of southern Alberta, reports Labor Bureau officials; the demand for help is not general, and needs have been filled in the areas themselves. In the northern section of the Province, as in the south, the early work will be taken care of by residents of the areas, it is stated.

Altho the demand for help in this district is not very heavy, job seekers have been flitting thru town for the past two week, with only the odd one getting the call to work. Times have changed since the era when a transient secured a job so soon as he dropped from a passing freight.

In this district, as yet, the demand has not come up to that of former years.

"The Secret of Madame Blanche."

What promises to be a screen treat awaits patrons of Mr. Goodman's show at Kelly's hall tonight, Aug. 23. This will occur when Irene Dunne is seen in her newest picture "The Secret of Madame Blanche." This well-known and popular actress will have associated with her Lionel Atwill and Phillips Holmes. These screen fans with a liking for mystery plays should not fail to see this picture.

The wet evening on Thursday last did not deter a good sized assembly of patrons from seeing Jean Harlow and Clark Gable in that very interesting screen success, "Hold Your Man." The opening skit "The Complete Coverage" was the source of much merriment, this "comic" being full of ludicrous situations and was the cause of many side splitting laughs.

This Changing World

Probably no period of recorded history can show such a succession of surprising and kaleidoscopic changes, political and economic, as that through which we are passing. The vast complex of peoples and nations comprising the civilized world to-day is in a state of uniformly unstable equilibrium—an equilibrium disturbed from time to time by a variety of insurrections both major and minor. So frequent are they, so unexpected their character, so far-reaching their effects, that few even of the great among the prophets dare risk portraying the face of things to come in the immediate future. They feel safer in making (and indeed they prefer to make) their predictions at long range, and to envision a world more remote in time than that which is likely to concern much the present much-abused generation.

The political and economic changes which occurred during the storm years of 1914-18, the revolutionary upheavals which wrecked dynasties and brought new state forms into being, probably were larger in scale. But they were not so numerous nor, for that matter, did they strike with ruder shock than those of more recent occurrences. The protracted strain of the war itself served to dull and deaden the sensibilities of the people directly subjected to it, and, more inured to shock, they were inclined to lump all the catastrophes into one—the War. They were inclined, too, to the belief that, once peace were restored, the world would quickly revert to the pre-war basis and settle anew to the ordered routine which seemed so stable until the unexpected happened at Sarajevo.

The world, however, has refused to settle down, refused to revert to the former status. The well-ordered machine which made this seem the best of all possible worlds until the summer of 1914, has never regained its old momentum. The people hanker for peace and a chance to routine their existence. They wish to remodel the new world on something like the old lines. But peace is denied them—peace, security and comfort, the comfort which comes from an assured livelihood. All is unrest. They feel they sit upon a volcano about to erupt, and nerves agitated by uncertainties make them the more susceptible to the recurrent shocks which evidence the turmoil beneath. Thus the crises of the depression appear more menacing than those which occurred during war-time which stunned, rather than agitated.

Recent events in Austria and Germany are symptomatic of the times. The world looks on with anxiety while these two nations writh in their efforts to evolve a state form which can bring harmony and happiness to their peoples. Equally significant to the world at large, however, are the experiments being tried in the United States and in Great Britain to evolve a new economy which will give work to the workless and restore the prosperity both, in the past, have enjoyed. Both experiments involve complete revolutions in the national economic life of those countries, but few would agree that either yet had found the solution within itself.

It is unnecessary to enumerate the many changes during the period of depression. Books on political and economic subjects become obsolete in a day. Anyone who reads knows that. Take, for example, the following quotation from a book which reached shelves of public libraries in Western Canada little more than a year ago:

"Nobody doubts, for instance, that America will overcome the present difficulties once it gets a grip on itself. France is sitting comfortably, and even Germany is held to have a fair chance. . . . But the issue is more doubtful for Great Britain because her malady seems more fundamental. Already, the British Empire has fallen from its former high estate."

The picture has been entirely reversed since then. Scarcely a statement in the quotation stands to-day—and that is but a sample of the dangers besetting the world-behemoth in this dynamic, fluid world. Apparently, the unstable condition will continue until every nostrum and every alleged cure-all has been tried and tried in vain. Then perchance, a world on the verge of ruin will realize that it is not so much the medicine that is wrong as the diagnosis. Indeed, were international enmity replaced by international amity almost any kind of political or economic medicine might cure remaining ills.

Realises Its Value

Governor-General Is Patron To Junior Farm Clubs

Club members and everyone associated with club work for farm boys and girls will sincerely appreciate the great honor that has been accorded to the junior farm club movement by His Excellency the Governor-General, the Earl of Bessborough, who has extended his patronage to the Canadian Council on Boys' and Girls' Club Work.

The recognition that His Excellency has thus given to the value of junior club work in Canada should encourage greater activity on the part of every club member and stimulate a deeper sense of the opportunities that are provided in this form of agricultural extension.

Criminals Steal Arms

1,027 Guns Taken From U.S. Armories Since 1932

The underworld has stolen 1,027 guns—ten of them machine-guns—and 25,110 rounds of ammunition from national guard armories in 29 states since January 1, 1932. William Stanley, acting United States attorney-general, gave the information.

At the same time he revealed the department of justice has asked the war department to prevail upon state governors to end these thefts. Stanley reminded that the federal machine-gun law which took effect recently, is intended to close fire-arms channels to the criminal.

Bridge and bridge tournaments are regarded as gaming in England.

Diarrhoea, Dysentery, Colic Cramps and Stomach Pains

Prompt treatment with Dr. Fowler's Extract of Wild Strawberry in such cases relieves the pains, checks the looseness of the bowels, and thus does away with the suffering, the weakness, and oftentimes the collapse associated with attacks of this kind.

It does this by checking the too frequent and irritating stools, settling the stomach, and tracing up the weakened system, thus making it a remedy for the treatment of bowel complaints of both young and old.

On the market for 85 years—you do not experiment when you use it.

British Dominions

Emigration Society

Secretary Returns To England After A Visit To Canada

Concluding his forty-second visit to Canada from Britain, Robert Culver, secretary of the British Dominions Emigration Society, returns on the Cunard White Star liner Ascania from Montreal.

"I am impressed," declared Mr. Culver in an interview, "with the improvement in Canadian business conditions over last year. There are many signs of material progress and a feeling of returning confidence among influential people I have met here this year. I feel that before long we shall have a greater opportunity of increasing the work of our society in the Dominion."

"The British Dominions Emigration Society was founded in 1882 by Prebendary Kitchin. During these 52 years over 37,000 have been assisted to emigrate, and the feature of the work I am most proud of is that we have never charged one cent interest on the money advanced. It was not surprising therefore, though most gratifying to our society, to receive a commendatory letter from your Prime Minister, the Rt. Hon. R. B. Bennett, paying warm tribute to our work upon the occasion of our 50th anniversary. At the present time our work is almost entirely confined to the re-union of British families."

The society enjoys the high presidency of H.R.H. Princess Louise, Duchess of Argyll, and a list of distinguished vice-presidents which includes The Most Noble the Marquess of Salisbury, K.G., G.C.V.O.; The Right Hon. and Right Rev. The Lord Bishop of London, The Right Rev.

Robert Culver and R. Gordon Burgoyne of the British Dominions Emigration Society, who returned to Britain on the White Star liner Ascania.

The Lord Bishop of Stepney, The Right Hon. Lord Lloyd, The Right Hon. Lord Middleton, Sir Archibald Weigall.

The society's Canadian manager is R. Gordon Burgoyne of Montreal; the local committee includes many business and professional leaders.

Committees of similar calibre co-operate with the society in Toronto, Halifax and Saint John, N.B.

Assistance to emigrate takes the form of grants or loans made under varying conditions to suit circumstances, to British-born subjects of good character and sound health; also of advice and help to settlers after their arrival.

"It has been found by our representatives in Canada," Mr. Culver said, "that large numbers of men go out, leaving their wives and families behind, with every hope and good intention of soon being able to send for them. They make good in the various cities and towns throughout Canada, but very quickly find that after keeping themselves and sending money home to help to keep their wives and families in Britain, it is utterly impossible for them to save the amount required to bring their wives and families out. One of two things is then bound to happen—the man have to throw up their

good permanent work in Canada and return to the Old Country to swell the ranks of the unemployed there, or they have to receive assistance towards the cost of the transporta-

Makes "Color-Music"

Attachment For Piano Invented By English Engineer

I. Shamah, English electrical engineer, has invented an apparatus for making "color-music" which may be used in any home as an attachment to a piano. By means of this, a drawing room may be flooded with diffusing lights which will automatically react in colors to whatever tune is played. He has so graded the vibrations of a piano in proportion to each other that each note has its own exact shade, so that it will be possible for instance, to play "God Save the King" in a combination of shades varying between red, white and blue; the "Blue Danube" in green and blue, or the "Moonlight Sonata" in yellow and silver. Another invention by Mr. Shamah enables one to "feel" music. You hold two metal tubes and when a tune is played you feel the rhythm of it like a beating pulse, which send a pleasant tingling sensation up the arms.

A Pulpit On Wheels

Sixteen Places It Where People Can See Minister

In the Church of St. James, Cleveland, is a pulpit on tram lines. The pulpit which existed before 1888, was very high and ugly, so it was decided to cut it down to its present proportions. When placed in a certain position in the church it concealed the altar, and when in the only other suitable position, people in the gallery could not see the preacher. Now, before the sermon, the sexton pushes the pulpit on its lines to the centre of the church, and after the sermon it is pushed back again.

OFF COLOUR? HOW IS YOUR LIVER?

Wake up your Liver Bile
—Without Calomel

Your liver's a very small organ, but it certainly can get very congested and eliminate organs out of kilter by refusing to pour out its daily two pounds of bile into your bowels. You won't completely correct such a condition by taking salts, oil, mineral water, laxatives, candy or chewing gum, or roughage. When they've moved your bowels they're done—and you need a liver stimulant.

Dr. Williams' Little Liver Pills will soon bring back the sluggishness into your life. They're purely vegetable and non-habit forming. No side effects. Satisfaction. 25c at all druggists.

W. N. U. 2060

Proposals To Change B. N. A. Act Will Be Considered At Dominion Provincial Conference

Proposals to change the British North America Act—Canada's constitution—will be up for consideration at the next conference of Dominion and provincial governments.

When the conference in July concluded, Premier R. B. Bennett suggested to the provincial premiers they meet again in October. This was regarded as a tentative date. It may be earlier or later but in any event it will be before the next session of parliament.

Under the B.N.A. act, social services, direct relief and similar responsibilities were placed on the shoulders of the province and the fields of taxation were defined as between the provinces and the Dominion with these responsibilities in mind. In view of the wider field of taxation allotted the Dominion, it was provided that the provinces be given annual subsidies from the federal treasury. These have been revised from time to time.

The depression has entailed so much relief and social assistance that it has been contended they have become national problems and should be a Dominion responsibility. The Dominion has recognized this by carrying a considerable portion of the financial load. At the last conference the Dominion changed its policy in this connection and, instead of bearing a percentage of the direct relief regardless of how extensive it might be, in the future will make monthly grants of stated amounts to the provinces and the latter will look after administration without interference on the part of Ottawa.

The Dominion also contributes 75 per cent. of old age pensions paid by the provinces and there is also a movement to have unemployment and health insurance inaugurated. All these are provincial responsibilities although it is frequently argued they could be better administered as national undertakings instead of piecemeal with each province having a distinct system.

The provinces, particularly Ontario and Quebec, have been very jealous of their provincial rights and on many occasions appeals have been carried to the privy council in London or as it is commonly described "to the foot of the throne," when they felt the Dominion was infringing on their jurisdiction. Not infrequently the provinces have been successful in these appeals.

The Dominion takes the view that changes are necessary in the B.N.A. Act if it is to undertake relief and social services on a national scale. It might be necessary to change the subsidies of the provinces as well as extend the Dominion's jurisdiction.

At the conference in Jan. 1933, Premier R. B. Bennett laid down proposals in an agenda to broaden the federal powers to cope with such situations but at that time some provinces were not prepared to surrender their jurisdiction. There have been many changes in provincial governments since then.

Many are insistent that the Dominion carry a considerable portion of the load of relief because they claim the provinces are not to blame for conditions that have caused widespread unemployment. They may be more inclined to give the Dominion the power necessary to make unemployment a national obligation.

Although minor changes have been made in the B.N.A. Act, no such fundamental changes as now suggested have ever been made since the act was passed uniting the provinces into the Dominion.

Makes Flying Automatic

An invention enabling aeroplanes to operate automatically, including the take-off and landing, has been acquired by the French Army, after a year of tests. The invention, the work of four French engineers, was said to simplify piloting to an extent which would enable a child to run a plane.

Husband: "You know, darling, that play made me think."
Wife: "Yes, it certainly was an extraordinary play."

W. N. U. 2090

Built in Record Time

Big Swimming Pool At Wembley Is Almost Finished

The Empire swimming pool at Wembley, England, now practically completed, is in many respects a world's architectural curiosity.

The building alone covers two acres of ground and is entirely of reinforced concrete. It has no steel girders and its 240-foot roof span—80 feet bigger than the main hall at Olympia—rises to a height of 90 feet without a pillar to uphold it.

It is erected on the cantilever principle—the first time such a feat has ever been attempted. Five and a half inches are allowed in the roof for expansion and contraction.

There are two acres of glass, and outside that two acres of ground for sun-bathing. It is the largest covered bath in existence, though its 200 feet by 60 feet looks almost insignificant, sunk in the floor of the vast hall. And one end it is ankle deep and at the other there is 16 feet 6 inches of water.

The pool holds 700,000 gallons of water and takes seven nights to fill. An apparatus for raising waves send surf up the steps on to the broad sides where bathers may sit and be swept by breakers as on a beach.

The filtering plant is the biggest ever, too. It will filter, sterilize and return 700,000 gallons of water every four hours. Port lights under the water illuminate the pool.

There are restaurants, bars, shower-baths and a flooding chamber. The normal 5,000 seats can be quickly increased to 8,000, or to 12,500 for a boxing match. In the winter the pool may become a vast ice rink.

It has all been built in record time to house the Empire Games aquatic, boxing and wrestling events.

Grasshoppers Destroyed

Vast Numbers Dead From Ravages Of Parasite Fly

Nature has laid the hand of death on millions of grasshoppers in the Sullivan Lake area in Alberta. Government experts report findings of numbers dead from the ravages of a parasitic fly which lays its eggs in the body of the grasshoppers.

The dry bed of Sullivan Lake had proved a great breeding ground out of which they flew and did immense crop damage. It was covered with wild clover which provided their first food, then they turned to grain fields as the drought progressed.

The antlers of some Alaska moose have a spread of over 70 inches.

United Empire Loyalists Recently Celebrated The 150th Anniversary Of Canadian Exile

Kemalist Government

Is Fighting Illiteracy

Great Progress Has Been Made In Turkish Education

Illiteracy is being combated by the Kemalist government. According to the last census, in 1927 only 10 per cent. of the Turkish population was able to read. It is estimated that, at present, about half of the population is literate.

Aside from normal school activity progress is chiefly due to the work of adults' evening schools, which were organized when the Latin script was introduced four years ago. Education in the army, where the young recruit is acquainted in a course of three months with reading, writing and arithmetic, also has done much to diminish illiteracy.

Primary education is obligatory. Great stress is being laid in all schools on physical culture for boys and girls alike.

Education is free of charge and even in government boarding schools no fee for the maintenance is made.

Internal reforms of Hikmet Bey, energetic minister of education, leave no doubt that it is not the facade only which is being changed. He has ruthlessly dismissed more than thirty professors of Istanbul University as not corresponding to modern standards of science.

Most of them have been replaced temporarily by foreign scientists. Other experts have been invited from abroad to serve in high and secondary schools.

New Machines For Mines

Pit ponies doomed in their work, are now being replaced by electrical apparatus in the British Isles. The new machines have no many advantages over the game little animals which spend all their lives in darkness when many orders for it are being received from abroad.

Just A Deadlock

Enemy at the Manoeuvres—"You are my prisoner."
Sergeant Binks—"Nonsense! How did you get here?"
Enemy—"Over the bridge."

Sergeant Binks—"Then, my dear fellow, you are drowned. We blew up that bridge yesterday!"

CANADIAN HORSES SHIPPED TO BARBADOS

Seventeen Canadian half-bred saddle horses are en route to Bridgetown, Barbados, British West Indies, consigned to the Inspector General of Police for Barbados. This is the second purchase of Canadian saddle horses by the Government of Barbados for its police force which is new. The horses in the picture are all bays, browns and chestnuts and stand from 15 hands 2½ inches to 16 hands high and were sired by thoroughbred stallions.

The intensive efforts of the Dominion Department of Agriculture in the past in creating breeding stations for horses, particularly of the saddle type, are now being duly appreciated by other nations, and it would appear that at least a great horse industry may arise from the foundations so well and truly laid by the Dominion Livestock Branch, by the experimental farms, and other associated divisions of the department. Recently there have been several shipments of horses abroad. Seventeen Canadian half-bred saddle horses have just arrived at Bridge-

town, Barbados, British West Indies, for the Barbados police. This shipment constitutes the second purchase of Canadian saddle horses by the Barbados government for its police force within a year. Several months ago 15 horses were shipped and gave such eminent satisfaction that the additional order referred to was the result. The second shipment to Barbados was purchased from the breeding stations at Allen Craig and Brampton, Ontario. The horses are bays, browns, and chestnuts, standing from 15 hands 2½ inches to 16 hands high and sired by thoroughbred stallions. Several inquiries have been received

during the past few months from other countries for various types of horses raised in Canada. A few weeks ago 19 draft horses were sent to Scotland where they have given the utmost satisfaction, particular notice having been taken of their excellent all-round appearance. Nine of these horses, all grade Percherons, were from Western Canada, having an average weight of 1700 lbs. Ten of the horses, three of them Clydesdales, hailed from Western Ontario, the heaviest horse being 1920 lbs. About the same time a trial shipment of 12 Clydesdales was shipped to Chester, England, and recent satisfactory reports have been received.

Readers of London newspapers have had a "refreshment" on American history, particularly as it relates to the United Empire Loyalists of Canada. The occasion arose with the publication of a news item that the "American Loyalists" had celebrated the 150th anniversary of the "exile of their ancestors in Canada."

The Morning Post on request has received an explanation from the United Empire Loyalists' Association of Canada reading in part:

"During, and more especially at the close of, the American Revolutionary War there was such a spirit of vindictiveness and intolerance exhibited toward those who had been either in deed or in spirit loyal to the British crown that many thousands were forced to leave their homes and possessions and seek shelter in Canada and elsewhere.

"At the treaty of peace, 1783, their banishment and extermination was a foregone conclusion, and the bitterest words ever attributed to George Washington were in reference to the Loyalists, 'He could see nothing better for them than to recommend suicide.'"

"The exact number of these exiled Loyalists unknown; certainly more than 85,000 went to Canada, and it is an error to suppose that Canada was the only country to which they migrated. The Loyalists from all quarters of America embarked for England, Scotland, Newfoundland, Cape Breton, Ireland, Bermuda, Bahamas, Florida and Jamaica.

"The Loyalists were by no means all of English or British descent. They contained large numbers of New York Dutch, the descendants of the founders of New Amsterdam and Albany; German Palatines, whose ancestors settled in Pennsylvania. There were descendants of the original Swedish settlers of Rhode Island and of the French Huguenots of New Rochelle. There were large numbers of Quakers, the Highland Scotch settlers of Sir William Johnson and the Mohawk branch of the Six Nations.

"The descendants of these Loyalists now reside in all parts of the Dominion, proud of their British tradition and proud of the 'Mark of Honor' bestowed upon them by His Excellency Lord Dorchester, the governor-general of the province of Quebec, and confirmed April 6, 1796, by proclamation of His Excellency John G. Simcoe, lieutenant-governor of Upper Canada.

"Those Loyalists who have adhered to the unity of the empire and joined the royal standard before the treaty of separation in the year 1783, and all their children and their descendants, by either sex, are to be distinguished by the following capital affixed to their names, U.E., alluding to their great principle, The Unity of the Empire."

Gasoline Problem

Tests Show That Efficiency Varies Under Different Conditions

A three-year study of service station gasoline, revealing its "test" efficiency varies from week to week, even day to day, and from station to station, was made public recently at Walker Laboratory of Rensselaer Polytechnic Institute in Troy, N.Y.

The variations were found in the same brands of gasoline, from causes all or mostly outside the manufacturer's control and due to storage, delivery, weather and the heredity of the gasoline. The study showed the changes may be sufficiently great to affect car performance, but probably not enough for the average motorist to notice.

They disclosed new "kinks" in the gasoline problem and indicated there has been a broad improvement in motor fuels, in that they increasingly approximate the car needs for which they are made.

It was explained that some of the gasoline escapes by evaporation, and the truant portion is that fast-vaporizing stuff which affects the "test" rating.

We don't know what the world is coming to be like, it would come too, says the Brandon Sun.

WORLD HAPPENINGS BRIEFLY TOLD

Hon. Irene Parley has been sworn in as minister without portfolio in the Reid government.

The Soviet Union has named M. Ostrovski as its minister to Roumania. Recognition of the Soviet by Roumania came a few weeks ago.

A gold rush has developed north of Grand Marais, Minn., in Ontario, where a vein has been struck which has yielded \$17.50 worth of the precious metal to the ton.

In accordance with a wish expressed in his will, only six words appear on the tomb of President von Hindenburg. They are: "Paul von Hindenburg, 1847 to 1934."

Old King Winter opened his 1934 assault on Aug. 14 at Hornepayne, Ont., when a high north wind brought with it intermittent snow flurries, at a temperature of 40 degrees above zero.

China exacted retribution for the murder of Dr. J. H. Ingram, 57-year-old American missionary, by bandits two months ago, when the provincial government executed five Chinese convicted of the crime.

The first studio in India for production of sound pictures has been opened at Calcutta. American equipment that cost \$100,000 was used for production of news reels is being used.

Demand for denunciation of the Washington naval treaty before December 31, 1934, was voiced by high Japanese naval officials, including Minister of the Navy Admiral Osumi, according to reports received from Tokyo.

Premier Mitchell F. Hepburn, of Ontario, renewed his demands for monetary reform before a meeting in honor of Hon. Dr. Leonard J. Simpson, minister of education, and declared Australia had practically settled her economic problems, no Canada could do the same.

Little Journeys In Science

AMMONIA

(By Gordon H. Guest, M.A.)

Ammonia is a colorless gas which has a characteristic, pungent, powerful odor. It is about one-half as heavy as air and is very soluble in water. Ammonia gas is easily changed to a liquid. At ordinary temperatures a pressure of about 66 pounds per square inch is sufficient to liquefy the gas.

Ammonia will neither support combustion nor burn in air. Although inactive when dry, ammonia will, in the presence of a small amount of moisture, react with acids to form substances known by the chemist as ammonium salts. For example, on mixing the fumes of hydrochloric acid, which is known commercially as muriatic acid, with ammonia a heavy white cloud of ammonium chloride is formed.

Liquid ammonia is used very extensively in making artificial ice and in producing the low temperature required in cold storage plants. This use of ammonia depends on the fact that it can easily be liquefied at ordinary temperatures by applying pressure. When the pressure is released the liquid ammonia evaporates, absorbing a great deal of heat from the surroundings. This evaporation usually takes place in pipes surrounded by a solution of salt which is not easily frozen. This cooled salt solution may be piped to a cold-storage room, or case of fresh water may be immersed in it to produce ice.

Ammonia gas is very soluble in water and is therefore usually sold in water solution under the name of "aqueous ammonia," which is used as a cleanser both in the home and in the industries. Large quantities of ammonia are used in the manufacture of fertilizers, and in making ammonium compounds such as smelling salts.

Atlantic salmon, unlike those of the Pacific, do not die after spawning.

Turkish can be cleaned from copper and brass by using buttermilk.

Christmas Seal Campaign

A.C.T. To Aid Saskatchewan Anti-Tuberculosis League In Worthy Effort

The Associated Canadian Travelers, with a membership of close to five hundred, and clubs in five of the leading cities of the province, have joined forces with the Christmas Seal Sale committee of the Saskatchewan Anti-Tuberculosis League and their entire membership for two months this fall will boost the sale of sheets of their cheerful little stickers, the revenue from which is accomplishing such gratifying results in the prevention of the spread of tuberculosis in Saskatchewan.

This alert organization, being desirous of associating itself with some humanitarian cause in which every member could actively participate, is determined to make this effort real success. Its membership in five of the leading cities of the province have wholeheartedly signified their approval of the Christmas Seal Sale as a major activity, and on September 1st will initiate a campaign that is designed to enlist the support of the entire business community of the province.

While the generous manner in which wholesalers and retailers have supported the Christmas Seal Sale in the past is fully realized and appreciated, it is also felt that the response would be much greater if the purchase of the sale was fully understood and that a larger group of people would be reached by a canvass such as the Associated Canadian Travelers have volunteered to make. Personal contact means a great deal in any effort and this will be provided by the A.C.T. members, each of whom will be supplied with a pamphlet giving full information regarding the work of the Saskatchewan Anti-Tuberculosis League and the all-important preventive work that is made possible by the sale of Christmas Seals.

The information contained in this pamphlet is of vital interest to everyone and is of great value to every resident of Saskatchewan. Here are some of the facts in a nutshell:

The tuberculosis death rate in Saskatchewan has been reduced 25 per cent. in the past four years.

The cost of treatment in Saskatchewan was over \$200,000 less in 1934 than in 1930.

Since preventive work was commenced in 1928, a total of 29,673 persons have been examined at the expense of the Christmas Seal Preventive Fund.

Proceeds from the sale of Christmas Seals provides the funds for preventive work. This disclosure cases in their early stages, making recovery more certain and reducing the period of treatment and the cost to the taxpayers.

The money raised by taxes for the maintenance of the three Saskatchewan Sanatoria is for treatment only; the money for preventive work is raised by the sale of Christmas Seals.

Prevention of tuberculosis and the protection of the well from infection is equally as important in the fight against tuberculosis as the care of those suffering from the disease.

During 1933 there were three hundred deaths from tuberculosis in Saskatchewan. During the past six years one-third of all deaths from infectious diseases in this province have been due to tuberculosis. It is now the most fatal of all infectious diseases.

The education of everyone regarding the control of tuberculosis.

The provision of clinics for the examination of all persons having symptoms of tuberculosis, who are suspected by their family doctors of tuberculosis. Among 7,239 persons suspected and referred by physicians to clinics, sanatoria and convalescents during the past four years 858 cases were discovered.

The sale of Christmas Seals is a benefaction which appeals to everyone who desires to support a humanitarian cause, and through the efforts of the members of the A.C.T. a great many more people will this year be afforded an opportunity of contributing thereto.

Survey Of Accidents

Record Shows 22 Is Dangerous Age For Motor Driving

The dangerous age for automobile drivers is 22.

This is the information contained in a statement issued by the governor's committee on street and highway safety following a three-year study of automobile accidents in Massachusetts.

"Of all operators licensed, approximately one-seventh are 22 years of age or under. Of operators involved in fatal accidents, about one-quarter are 22 or under," according to the highways committee's statement.

"In proportion to the smaller size of this group," the committee's statement reads, "its accident record is enough worse than the performance of the elder class to warrant special attention."

According to the Smithsonian Institution, there have been no major changes in outlines of the oceans and continents since earliest times.

LIGHT

By MANLEY F. MINER
Son Of Jack Miner, Canadian Naturalist

While walking quietly through an evergreen grove recently my attention was drawn to the fact that the trees had grown tall and rank, and as the soil was very rich in food for such trees they were very thick, all growing straight up for light. Each one trying to poke its head out above the other, but on close examination, all the lower limbs were dead while the tops of the trees were much alive. And what was the cause? On close investigation it was revealed

Yes, man might be alive bodily but be completely dead spiritually, and unless he keeps in tune with the God, he is bound to die gradually, the same as the tree does, limb by limb as it misses the light.

After having this thought come to me, as I was alone with Nature, walking through this grove, I went home, and as I love to play my violin, picked it up, only to find it out of tune. Like all other string instruments they get quickly out of

Jack Miner and Rev. W. A. "Billy" Sunday, the Evangelist. Photo taken on a recent visit of the famed naturalist to Jack Miner's home.

that these limbs and lower branches were not getting light. Light that everything needs. Thus, without light these lower shoots from the trees were dying one by one because God's plan is that anything that lives must have light and heavenly food continually, or else they die and perish. And as I looked I thought of how this same example could apply to humanity. If we don't accept light and keep in tune with the infinite God, Nature, or whatever you have a mind to term it, we soon die.

tune by the action of the atmosphere. No matter how good your violin may be, it needs to be tuned every day and many times a day. The same can be said of man. The wear and tear of life and the demoralizing atmosphere he often comes in to which sin creates, so affects his disposition that he needs to be brought into harmony with God, in tune with God every day and many times a day. Thus man cannot live on bread alone, he must have light and be kept in tune with God between meals.

Were Good Spellers

Secretary And Teacher Defeated All Others In Match

A spelling bee was won in New York by two women, who were victors in the annual Town Hall Club spelling bee. One, a private secretary, and the other, a school teacher, defeated a university professor, an editor, a foreign correspondent and a dozen others. They were Miss Lou Heimann, the teacher, who won the first of the two sections by spelling "polyphony" and "plagiarism," and Miss Elma Kelley, the private secretary, who won on "necrophagus."

HOSEA PREACHES GOD'S LOVE

Golden Text: "For God so loved the world, that he gave his only-begotten Son, that whosoever believeth on Him should not perish, but have eternal life." John 3:16.

Lesson: Hosea, Chapters 6, 11, 14. Devotional Reading: Psalm 36: 5-10.

Explanations And Comments

Jehovah's Love for Israel, 11:1-4. "When Israel was a child," in the beginning of its natural existence, "then I loved him, and called my son out of Egypt." "Called him, locally, into the land of Canaan, and morally, to set an example of true religion" (Cheyne). "Hosea dwells on that beautiful past, half in melancholy reflection on the contrast, and half in persuasive pleading that the old relations between the nation and their God may be restored. The early days in Egypt and the Desert were a history of grace on the part of God. The prophet stops in his message of doom to recall lovingly the early periods of Israel's national existence, and sees God's love claiming them; and meeting with fit response." (Black).

The Prophet's Entreaty, 14:1-3. Hosea entreats the people of Israel to return to the Lord, and bids them offer this penitent prayer: "Take away all our iniquity and accept what in us is good; instead of burnt-offerings (bullocks) we offer thee thy prayers (the offering of our lips). God will no longer trust in Assyria nor in Egypt, nor in idols, the work of our hands, but in thee alone, helper of the fatherless."

Assurance of Divine Mercy and Loving-kindness, 14:4-8. To this penitent prayer the Lord will respond: "I will heal their backsliding, I will love them freely. See Hosea 6:1; Isaiah 51:18. Hosea is very sure of the mercy and loving-kindness of God. If this rebellious countrymen will repent, they will be forgiven. "I will be as the dew unto Israel."

The dew is often used metaphorically for spiritual blessing. Dew falls on vegetation and revives it and causes it to grow; but it does not fall on barren rocks where it would be of no avail. The Lord is as the dew to human souls.

Luminous Human Body

Story Comes From Greece Of Strange Freak Of Nature

Another luminous human body engrossing scientific attention occupied columns in the Athenian press, recently.

Antisthenes Ekonomos, a mailman at Saloniki, is the subject of this second recent discovery. In Italy recently a woman whose body was seen to give light while she slept was placed under observation in Rome. But she failed to respond.

Economos' body was said to give out sufficient rays to light a dark room.

ARGENTINE ASKS FOR A LARGER WHEAT QUOTA

London.—Argentina's demand for an export quota of 150,000,000 bushels of wheat during the current crop year, just started, was understood to have been presented to the international wheat conference.

This and the drawing up of a common policy by the closed meeting, recognizing the necessity for introducing more elasticity into the quota system for the current crop year were highlights of the proceedings.

The speech by Rodolfo Garcia Arias, Argentina's new wheat delegate, included presentation of Argentina's case in the long controversy with the three other big exporters, Canada, Australia, and the United States. Various other representatives outlined the attitude of their nations towards the future operation of the 1933 world wheat pact. None of the speeches were made public.

Garcia Arias, however, was reliably reported to have given an optimistic report on acreage reduction in the Argentine. He was understood to have charged other big exporters with placing obstacles in the way of the Argentine's efforts to persuade farmers to plant other crops, by refusing to increase her quota when she sought enlargement last year.

Argentina exceeded her quota of 110,000 bushels for the crop year ending July 31, covered in the wheat pact, by some 34,000,000 bushels. Other big exporters were under their quotas.

The Argentine delegate was said to have stressed that when the quotas were accepted the Argentine had no expectation of the bumper crop that actually developed.

Argentina, he explained, depends on selling on a quantity, not quality, basis, and therefore firmly opposed the minimum price scheme which fell through this spring. He also it is understood, declared the others could easily allow her a bigger quota than she alone among the big exporters expects a good crop this year.

The communique issued at the close of the meeting said the delegates were generally agreed that while the small 1934 crop in North America would lead to an easier position as regards the surplus stocks, it must be realized any abandonment of international collaboration to adjust supply and demand in event of normal yields next year, would lead to an accumulation of new surpluses.

Andrew Cairns of Canada, the permanent secretary, said the committee's attempts to increase world consumption were disappointing except in France, where the combination of lowering the quantity of flour extracted from wheat and of denaturing for livestock feed resulted in considerable increase in consumption.

To Teach Agriculture

Subject For Ontario Schools Beginning At Third Year

Fort William, Ont.—Speaking at the Lakehead exhibition, Hon. Duncan Marshall, minister of agriculture in Ontario, announced that the new government had decided to have agriculture taught as part of the public school curriculum in the province, beginning at the third book.

The minister of education is now working on the details which will involve the instruction of teachers in the upper grades. The Hepburn government, he said, had as its aim the improvement of marketing and educational conditions to meet the needs of the farmer, and intended to try to give all children passing through the schools an insight into and love of agriculture.

Might Mean Complications

Montreal.—Any tampering with the British North America Act would be bound to entail serious complications, Premier L. A. Taschereau, of Quebec, declared here. His statement was made when questioned concerning the reported plan of Premier R. B. Bennett to call an inter-provincial conference in the fall to study certain amendments to the constitution of the Dominion.

W. N. U. 2060

For World Peace

Pacifist Urges Christians To Refuse To Fight

Edmonton.—The Christian alternative for maintenance of world peace by armament preparation is substitution of the missionary way for the military way, declared Rev. Leyton Richards, D.D., of London, England, in a public address here. Dr. Richards, noted international pacifist, is lecturing in connection with the United Church School of Religion sessions.

The aim of the Christian church is not direct elimination of evil but destruction of the cause of evil," the speaker declared. "We do not wish to destroy the enemy, we wish to destroy enmity. To wage a war to end war results in multiplication of disturbances; the only way to eliminate international conflict is for Christians to refuse to fight. Christians cannot kill men in the name of Him who died for men."

Pleading for dissemination of the gospel of peace, Dr. Richards asserted that the British Empire spends 1,000 times as much for the nation's money in preparation for war as it does for maintenance of peace. "England could not do the Christian thing in the 1914 dilemma because it was not a Christian nation," he said.

Canada And Australia Reach An Agreement

Australia Not To Sell Flour In Eastern Canada

Ottawa.—Under an arrangement arrived at by the governments of Canada and Australia, the latter will prohibit further shipments of Australian flour to Eastern Canadian ports. Australian flour will be permitted to enter Western Canadian ports free of customs duty.

Announcement of the new arrangement was made at the office of the prime minister. The matter has been under negotiation between the two governments since last June when Canada gave notice, as provided by the trade agreement, that the sale of Canadian flour was being prejudicially affected by shipments of Australian flour into eastern Canadian markets.

It was explained there has been a market for Australian flour on the west coast for many years. The arrangement now reached will not interfere with this.

Wheat Sales

Alleged That British Interests Made It Difficult To Sell Wheat

London.—During the past crop year British interests took a position in the Winnipeg market which made it difficult for Canada to sell her crop, John MacFarland, general manager of the Canadian Wheat Pool is reported to have declared at a closed meeting of the international wheat advisory committee.

Increased offerings at Liverpool on the part of Argentine shippers depressed the market, Mr. MacFarland is supposed to have stated. The British traders' action in Winnipeg is said to have followed in an effort to forestall any sudden rise in prices should the Argentine pressure be relieved.

Admiral Byrd Recovering

Takes Stroll In Open Air With Temperature 61 Degrees Below Zero Little America, Antarctica.—Rear Admiral Richard E. Byrd had recovered sufficiently from a touch he had had to take a stroll in the open air at his advance base, 123 miles south of here. The admiral had a temperature of 61 degrees below zero for his stroll.

Dr. Thomas C. Fowler, second-in-command of the Byrd expedition reported the trip back to Little America will depend on the health of Admiral Byrd.

For Big Navy

Washington.—Aiming toward a fleet second to none in the world, the United States Navy opened bids for 24 fighting vessels. Included are: Four cruisers, 14 destroyers and six submarines. The submarines and destroyers will be the first vessels laid down under the act of congress authorizing the building of the navy to treaty strength.

HEADS DELEGATION

Dr. John MacNeill, formerly of the First Baptist Church, Winnipeg, who is the chief Canadian delegate at the World Epiet Alliance which is meeting in Berlin, Germany. Dr. MacNeill is president of the congress, which is attended by delegates from sixty countries.

Auction Sale Of Cars

Ontario Government Cars To Receive Publicity

Toronto.—Auction sale of nearly 160 Ontario government automobiles will be held August 28 at Varsity stadium, Premier Mitchell F. Hepburn announced recently. The cars will be passed in review, bearing the names of the members of the former cabinet who rode them.

Bidders will occupy the main grandstand and the auctioneer will stand on a platform directly in front of them. Besides bearing the name of the cabinet minister, the cars will also carry placards showing the mileage covered and the cost of upkeep during the car's life.

Fear Wet Harvest

Scattered Showers Over Dry Areas As Cutting Commences

Winnipeg.—Prospects of a wet harvest season for garnering grain crops in drouth areas of the West troubled some of Western Canada's farmers to-day.

Rain in recent days visited more than a score of drouth sections of Manitoba, Saskatchewan and Alberta.

Starting with scattered showers, the rainfall increased to heavy storms in some areas. Manitoba points recently received a good soaking. Southern Alberta received rain before the hail deluge occurred and in some of southern Saskatchewan's dry belts precipitation was reported.

PARADISE BLOOMS IN THE PRAIRIES

It isn't a pretentious house, this home of William Ballaugh, who farms near Abernethy, Saskatchewan, but flowers and shrubs have turned it into a beautiful spot. With a belt of Manitoba maples on the west side of the farm, which affords shelter from the prevailing winds, almost every type of flower listed in the seed catalogue is growing in the garden, while trees and vines and shrubs have added wonderful charm to the mellow old place. The top picture shows the vegetable garden at the back of the house which would supply a small village with its vegetables, while the bottom picture shows a section of the front garden.

Feed Situation Not Greatly Improved

Dried-Out Parts In Alberta To Be Checked Up

Edmonton.—Intensive investigation is being conducted by the provincial government into hardships caused by drouth and hail in certain sections of Alberta. Premier Reid states.

The premier was interviewed by a delegation, members of which placed their various situations before him.

Replying to the delegation, the premier said that it was apparent some relief would be needed in dried-out parts, and while there was some possibility of improvement in the feed situation, only a slight possibility existed. Therefore arrangements were being made for a canvas of the situation.

Assistance For Indians

Aid Given To Indians In Saskatchewan Third Lowest In Dominion

Regina, Sask.—Cost of assistance among the Indian population of Saskatchewan in the year 1933-34 was only 4.94 for each individual assisted, according to W. Murison, Saskatchewan inspector for Indian affairs. This is one of the three lowest figures in the Dominion, and it covered hospitalization, food, clothing, implements, seed grain and other relief expenditures.

Mr. Murison returned to Regina after a three weeks inspection tour of Indian agencies through the province. He was accompanied by Dr. H. W. McGill, deputy superintendent-general of Indian affairs at Ottawa.

Gangster's Weapons

United States To Sell Sale Of Machine Guns

Washington.—The United States government seeks to stop free circulation of the gangster's favorite weapon—the machine gun.

If a person possesses a machine gun after next month he will have to register it with the commissioner of internal revenue.

If he wants to get one after Sept. 24 he will have to get an order from the commission, be finger-printed, and pay a price posted by a sales tax of \$200.

Japan Wants Friendship

Victoria.—"Japan desires the friendship of the world much more than she wants territory," K. Inabata, member of the house of peers and Japanese industrialist said here recently following his arrival from Yokohama. He is en route to Edinburgh to attend the forthcoming world inter-parliamentary conference.

FEDERAL AID FOR ALBERTA SAID TO BE SATISFACTORY

Ottawa.—The province of Alberta now has before it a statement of what the Dominion government is prepared to do by way of assistance under the new "hump sum" payment plan. Described by Hon. George Hoadley, of the Alberta government as fair in view of the obligations which the Dominion is called upon to meet, the proposal comprises a monthly grant of \$100,000 for direct relief and loans aggregating over \$1,000,000 to Alberta cities and relief projects.

Loans to cities, aggregating \$750,000, are divided as follows: Edmonton, \$500,000; Calgary, \$200,000; Lethbridge, \$50,000.

To complete the Jasper highway, the Dominion will advance \$125,000. It will also furnish \$150,000 to assist in completion of the Alberta section of the trans-Canada highway.

The three Alberta cities will receive considerably less than they requested under the Dominion proposal. In the case of Edmonton the request was for \$1,500,000 of which a million was to be used for public works. Only \$500,000 is granted, but no strings are attached to it. Calgary's request for half a million was implemented only to the sum of \$200,000. Lethbridge asked for \$150,000 and got \$50,000.

A further amount of \$25,000 which the Dominion will contribute is earmarked for assisting in the payment of labor costs of a new building being erected at the Ponoka mental institution.

Devastating Hail Storm

Thousands Of Acres Of Crops Destroyed In Alberta

Lethbridge, Alta.—Thousands of acres of crops, mostly wheat, are in ruins, destroyed by the most devastating hail storm to strike southern Alberta in years. The loss, it was estimated will be far above the \$500,000-mark, many of the fields unprotected by insurance.

In a sweep 10 miles wide and 50 miles long, the storm struck with a deluge of rain followed by the destructive hail which in a few minutes battered down crops ready for the harvest. Farmers counted their losses which ranged as high as 100 per cent.

From Okotoks through Azure, Cayley, Nanton, Comenara, Vulcan to east of Champion and Camranga the hail took its heavy toll, ruining crops that gave promise of yielding more than 20 bushels to the acre. With the binders standing in the fields the crops were mowed down. The hail beat across 12,000 acres in the Nanton-Comenara area, with losses estimated to 40 per cent., and 6,000 acres in the Cayley district suffered loss of from 15 to 100 per cent.

In many places the hail laid on the ground inches deep after the storm passed, and with the torrential rain, fields were turned into miniature ice-covered lakes. Hundreds of birds were killed by the flying hail stones.

Insect Pests

Cutworm And Grasshopper Survey To Be Made In Saskatchewan

Regina, Sask.—Cutworms and grasshoppers in Saskatchewan and Alberta are due to go under the axe as entomologists of the entomological branch of the Dominion department of agriculture set out on field surveys of the 1934 insect crop.

A group of officials of the department from Lethbridge, Alta., who will conduct the annual survey for pale western cutworms through Saskatchewan and Alberta during the next three weeks, arrived here recently.

Ontario Police Reduced

Toronto.—A reduction of the provincial police force by 69 men was provided for in an order-in-council passed by the Ontario government. An annual saving of \$189,400 would be accomplished by the cut, Attorney-General Arthur Roebuck stated.

OCCASIONAL WIFE

By EDNA ROBB WEBSTER
Author of "Joretta," "Lipstick Girl" Etc.

SYNOPSIS

Camilla Hoyt and Peter Anson, young and in love, marry secretly, deciding to live their own lives apart until Peter is able to provide for her. Peter is a young, struggling sculptor trying to win a competition for a scholarship abroad and to get a job. He adopted daughter of a wealthy family. She is not to inherit money when she comes of age and is studying commercial art in the hope of landing an agency job. Others in the story are: Peter's mother, a wealthy girl who is trying to win Peter, Sylvia Todd, Peter's model, and Gus Matson, his former roommate with whom he has quarrelled. After a party at an exclusive club, when the rest of the members of the party go to a cabaret to continue the gaiety, Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When they awake it is early morning and Avis and another boy are standing near them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Camilla urges Peter to accept some of her earnings to help him along, but Peter refuses and she, too, must leave. After Camilla has gone from the studio, Avis Werth calls and persuades Peter to accept a loan of \$1,000. Peter finishes his exhibit and asks Avis and Camilla for suggestions as to a name for it. Camilla suggests "Eager Youth," and Avis "Inspiration." Peter adopts the latter title and Camilla, heartily, goes to Peter's studio for quiet and to think. Peter and Avis follow later, and as the lights are turned on, Peter has been shattered to pieces. Avis accuses Camilla of doing this, and Camilla, stunned by the disaster, is hurt and horrified by the accusation, faints.

At Camilla's suggestion, Peter enters as his exhibit a statue he has sculptured especially for her as a wedding gift. They named it "Land of Hope." Camilla's advertising campaign and Tuxy Tote broadcast was a great success, and Mr. Hoyt expressed his pleasure and surprise on learning that Camilla was the author and artist who was so ably stimulating business for his company. Peter's exhibit was awarded the Paris scholarship, and he prepares for his journey to France. After the ship's departure from New York, he is on his way to his cabin when he meets Avis Werth.

(Now Go On With The Story)

CHAPTER XVII.

Before Peter could recover from his surprise enough to speak, Avis smiled serenely and exclaimed, "Surprise, Peter!"

"Well, hello," he replied with a note of consternation in his voice. "You do have a habit of appearing at the most unexpected times and places."

"And aren't you glad to see me?" she asked in a hurt voice.

"Why, of course," he was rallying to the exigency of the moment. "As a matter of fact, I was just now headed for my cabin and wondering what I was going to do with myself on this slow-going craft for a whole week. But why in the world are you travelling on a tub like this?"

"To see that you are not lonely," she replied coyly.

"That is most considerate of you," he offered gallantly.

MATURITY—MATERNITY MIDDLE AGE

At these three critical periods a woman needs a medicine she can depend on. That's why so many take Lydia E. Pinkham's Vegetable Compound. 50¢ out of 100¢. "It helps me!" Let it help you, too.

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

W. N. U. 2080

"Oh, but I had a selfish reason, also. I didn't want to be lonely on another boat, you see. A week with a good travelling companion can be much shorter than five days alone."

"But I didn't know you had planned to go to Europe, now."

"Neither did I until two days ago, and you were so busy with your own affairs that I just decided to make it a little surprise to you."

"No doubt about the surprise," he admitted. "What's your destination—Paris?"

"Oh, yes. Always Paris. I travel here and there about the continent when I am over there, but Paris is always home to me. You are still wondering why I am going. It happened this way: I was talking with Professor Drake the other day and he said that in his opinion my talent lies in portrait work, and that the very best thing I could do was to study with Monsieur Boule in Paris. In my enthusiasm, I decided to go at once, and then hit upon the idea of taking the same boat with you, just for the fun of it. If I get over there and discover that I am not prepared to stay indefinitely, I'll take a fast boat back and start all over."

"How convenient it is to have money!" he sighed, smiling. "You'll be like that some day," she said confidently. "But there is no sense in our standing here like this. I must see that Tille gets us settled this afternoon; and then for a long, pleasant excursion work. Do you like the water?"

"I think I do," Peter grinned, "but I've never before been out where it is so deep as this."

She turned away, then hesitated. "Shall I arrange with the dining room steward to put us at the same table?"

"Why, of course. No sense in two good friends, stranded at sea on the same boat, sitting at different tables and wishing for congenial company. Or wait, I'll arrange for it, myself," he suggested on second thought. "It would look better for Avis if I sought her companionship, via tips to the steward."

"Fine!" Avis agreed, and reflected that it might be clever to arrange for the information to reach Camilla. Peter had bribed a dining room steward for a table with her. One could not imagine a man falling more neatly into her plans than Peter had from the beginning. True, it was a slow and tedious campaign, but well worth the time and patience. "See you at dinner, then," she left him gayly.

For two days' notice, Avis' trunk contained a surprising collection of things purchased for a definite purpose. She might have been on her honeymoon, so alluring she made herself for every day and every occasion of that voyage.

By the third day, it seemed quite natural for them to face each other across the breakfast, luncheon and dinner table; with deck games, contract bridge in the salon, dancing in the evenings or just sitting idly side by side in their deck chairs in the calm, indolent hours between activities.

Peter was seized by a spell of inertia, so easily developed aboard a steamer, and following the strain of busy days over many months—years, in fact. It was the first time he had relaxed from anxiety and work for as long as he could remember. It was so blissful to stroll idly around or lie in a deck chair with eyes closed and caressed by the warm salt breeze, to dream without doing and to plan without action. Avis had convinced him of the wisdom of a week of idleness. On the second day out, he had protested when she proposed a set of deck tennis.

"But I should be working, Avis. I expected to get a lot of extra things done this week."

"Aren't you the hear for work, though? Now let me tell you what would be the sensible thing for you to do, Peter. Make this week a real vacation. Forget everything except rest and a good time and be ready to leap into Paris in full swing with new ambition. You certainly deserve one week away from your work, while at the same time it would do you a vast amount of good. You must learn to play a little." She was so anxiously concerned for his welfare that he felt a responsive desire to humor her wishes, even while he acknowledged that she probably was right about it.

HOLDS FALSE TEETH TIGHT AS CEMENT

Plaster can't possibly slip when you sprinkle on Dr. Warren's Tooth Powder. It's the only tooth powder in the world—holds false teeth tight they can't annoy you so comfortably as they actually feel as like your own. Keeps mouth sanitary, breath pleasant—special comfort-cure condition—no other setting cream. Small cost—any drugstore.

It was that receptive mood induced by his complete resignation to idleness and pleasure into which Avis subtly sowed her seeds of intrigue that sprouted and flourished into a lusty romance which promised to bud and blossom.

By the third day, Camilla and American seemed vague and remote as to time and space; and Peter was luxuriating in the charm of Avis' gentle flattery, the pleasure of her gay, irresponsible manner, so different from Camilla's harrising confinement to work and ambition and obligation.

Avis captivated him in this period of lassitude and pleasure as she never had done in the atmosphere of work and ambition at the studio. She was part of this life which had seemed so unattainable to him and she made him feel that he had only to reach out his hand and grasp it. And although the Belgrade was not the epitome of luxury and service to which she was accustomed, it seemed magnificent to Peter who had so little ease and beauty in his life.

If Camilla's ambition had inspired him and provided him confidence, Avis' holiday mood stimulated his desire to obtain what he wanted by the shortest route, to forfeit an ounce of proud struggle for a pound of easy victory. It wasn't so much her words and actions, as her manner and the way her very thoughts wilted him to her viewpoint.

There was also a full golden moon in conspiracy with wind-blown, dimly-lighted decks, in her favor. Sitting side by side, smuggled into steamer cups, with the vastness of the heaving sea stretching about them in all directions to remind them of the insignificance of man, of the futility of waiting for life while life passed by; talking, in intimate tones while the silver sheen of the moonlight and the eerie sound of the waves against the hull of the boat turned it all into a world of make-believe. Frolic life lost its proportions of importance. It was a mood in which man tells himself that this moment, this hour, is his to do with what he will. Why wait for that which never may be, and remember that which is lost to time forever? The lure of the present is sweetly intoxicating as one partakes of more and more.

Novel Heating System

Specialty-Treated Wallpaper Is Invention Of London Scientist

Heating system of novel design has been invented by a London scientist—working on the principle that the human body is always radiating heat to colder objects. He has invented a system which will raise the temperature of any room as high as that needed for human well-being. This will be done by specialty-treated wallpaper connected to the electrical system.

New White Star Liner

To Be Fitted With The World's Largest Ship's Propeller

The world's largest ship's propeller has left London for Clydebank. This propeller was the first of four specially designed for Number 534 and it was shipped by the steamer "Copeland" to the Clyde where it will be fitted to the liner.

With an approximate weight of 35 tons and a spread of nearly 20 feet from tip to tip of its Manganese Bronze Blades, its shipment occasioned a great deal of ingenuity and skill. Carefully wrapped in a protective covering of sheet iron and canvas it was hoisted on board the "Copeland" by the "Hercules," one of the largest and most powerful cranes used by the Port of London authority.

Before the propeller reaches the Clyde it will make a sea journey of nearly 600 miles. To ensure that the propellers will reach the shipyard in absolute safety, they are being shipped one at a time.

A start has been made at Clydebank in painting the hull of Number 534 for the launching ceremony. When the tens of thousands of spectators assemble at Clydebank to witness the launch they will see that the huge bulk of the ship presents a glittering appearance of light grey and red. The upper part of the hull will be a light grey, whilst the under-panels part will be red. Dividing the two will run the white "waterline" of the great vessel.

Scores of painters will be engaged in this task during the coming week, many thousands of gallons of paint will be used in completing this striking transformation.

THE RHYMING OPTIMIST

By Aline Michaelis

KEY TO DREAMS

The keys on my ring are of little worth. Leading to things well known; But here in my hand I hold a key Found on a paving stone.

Somewhat small for a gate, yet large for a door, Too long for a sailor's box; I turn it in my palm again And wonder what it unlocks,

No symbol of all I have seen on earth Is as potent as this to me, And I have no words for the strange allure Which lies in the unknown key.

Perhaps it might lead to a garden-plot, A hidden and lovely place; It might open a door in a foreign land And show eye a dreamed-of place.

And never, as long as I can grasp Closely this time-stained key, Will the gates of romance again be Or the door of dreams for me!

To Safeguard Drivers

Authorities May Stop Unofficial Testing Of Racing Cars

Now that the trial of Kaye Don has ended, it is stated in British racing circles that the authorities will decide to prohibit the use of racing cars and racing motorcycles on the roads out of official practice hours.

Kaye Don was sentenced by Demster Parrant to four months' imprisonment for the manslaughter of his mechanic, Francis Taylor, while practising out of official hours for a car race.

An appeal was lodged, and after being in custody for a few hours Kaye Don was released on bail.

The authorities for many years have given a great deal of latitude to the drivers and riders from all parts of the world who come over to take part in the races.

For both the long-standing motorcycle races and the car races of the past two years there are official practice races, for which the roads are closed. In addition, a tradition has grown up that any driver or rider who wished to make additional trials could do so without any risk of serious consequences.

Narcosis is one of the organic bases of alkaloids occurring in opium, in which it usually exists in the proportion of six to eight per cent.

BABY'S UPSET STOMACH

Relieved! Often in hot weather and occasionally at other times, little stomachs turn sour and acid. "When I notice any sign of sick stomach," says Mrs. J. Alphonsus Brown, Bayville, P.E.I., "I always give a Baby's Own Tablet." They quickly set things right, are very easy to take and quite safe. All common ailments of childhood including teething are promptly relieved with Baby's Own Tablets. See a package at drug stores. 10c

Dr. Williams' BABY'S OWN TABLETS

Little Helps For This Week

"I form the light and create darkness; I make peace and create evil; I the Lord do these things." Isaiah 45:7.

"All is God that is, and is to be; And God is God." Let this suffice us still. Resting in childlike trust upon His will.

Who moves to His great ends, unthwarted by the ill. —J. G. Whittier.

This then is of faith, that everything which touches us in mind, body or estate, whether brought about by this outward senseless nature or by the will of man, good or bad, is overruled to each of us by the almighty and all-loving will of God. Whatever befalls us, however it befalls us, we must receive as the will of God. If it is through man's negligence, or ill-will, or anger, still it is to us in the very least circumstance the will of God. For if the least thing could happen to us without God's permission it would be something out of God's control. His providence and love would not be what they are. Almighty God Himself would not be the same God, not the God we believe, adore and love. —E. B. Pusey.

Can Recommend Canada

Earl Of Chichester Thinks It Fine For Young People

The Earl of Chichester, who sailed to England after spending seven months in the office of Sir William Clark, British High Commissioner in Ottawa, summed up his views of Canada before he sailed, as follows: "If I were asked by a young man just out of school, I should certainly recommend Canada, but I should also point out that he would have to work hard. Canada is undoubtedly a country for a young man, but he'll have to work."

CHEVROLET CANADA'S GREAT SALES LEADER!

Try its
KNEE-ACTION RIDE
Today

HAVE you noticed how all Canada has taken to Chevrolet—and to Chevrolet's famous Knee-Action Ride?

Again in 1934—just the same as it was in 1933 and '32—public demand for Chevrolet cars has sent production to the highest total obtained by any manufacturer!

And if there is one single feature which more than any other has contributed to this great leadership, it is Chevrolet's hump-conquering, bounce-abolishing Knee-Action Ride! No other ride in any low-priced car

can compare with it for comfort, safety or stability! Owners themselves have proved that in millions of miles of driving.

Why not try the ride-sensation of 1934 today? We'll gladly provide a Chevrolet for you to drive yourself.

READY FOR IMMEDIATE DELIVERY

Master Six from \$844 Standard Six from \$710

Delivered, fully equipped, at factory, Ontario, Ont. Freight and Government license only extra. Low low time-price on the C.M.C. plan.

A GENERAL MOTORS VALUE . . . PRODUCED IN CANADA

Sommerfield & Mayer, Stony Plain, Alta.
Sommerfield-Mayer & Knight, Mayerthorpe.

USED CARS, SOLD WITH A GUARANTEE.

We have the Car for you—a Car your size, and at your price. Here are real values offered in these automobiles of various makes:

- 1930 Chevrolet Special Sedan; \$475
- 1928 Chevrolet Truck, \$225
- 1931 Ford Truck, 157-inch wheel base, one-and-a-half ton; new tires all around, \$500
- 1931 Ford Coach, with good spare, \$350

All Cars Reconditioned and in Good Shape!

Sommerfield & Mayer,

Agents for CHEVROLET and OLDSMOBILE CARS.
Agents for BRITISH AMERICA OIL CO.

The Only Correct Lubrication—We have the only 9000-lb. Pressure Gun west of Edmonton. Let us grease your car!

SERVICE GARAGE, Stony Plain.

Duffield Doings.

Miss Anderson, Public Health nurse, visited here last week and held a Baby Clinic under the auspices of the women's institute.

Grain cutting is now general in this district, with some fields showing good yields.

The Duffield Athletic Club will hold a meeting tonight, to discuss the matter of paying bills incurred at the time their Sports Day was held last June. The Chairman of the Printing and Advertising committee is expected to attend.

The Weather in Kansas.

A Kansas newspaper recently contained the following little note on the weather in that State:—"With grasshoppers & deep on the level in eastern Colorado, the western Kansas jackrabbits blocking the highways, temperatures round 100 in the shade, and a shower of gravel from every thunderhead which comes up regularly at sundown, there really isn't much to say about the weather."

LAST SUNDAY'S BALL TOURNAMENT A BIG SUCCESS!

Sunday's Contests Brought Together the Pick of the Teams from This and the Other Baseball Centers.

Local ball fans and their friends turned out in full force on Sunday last, at the local ball park, to have a look at the playing of the various teams in the widely advertised ball tournament.

The opening game, Onoway v Keep Hills, at first looked as if it should be a good game, but Onoway's good fielding began to tell, and by the middle of the struggle the result was a foregone conclusion—Onoway winning by 9 to 3.

The 2d game, Town of Stony Plain vs. Spruce Grove City, the latter's team got 9 runs for 7 innings, while their opponents got the goose egg.

The third contest was the game of the day, when some good playing was seen, each team doing its best to win; and it was nobody's game right up to the 7th and last innings. Final score—Spruce Grove City 9, Onoway 7.

Notes of the Game.

While the last game was in progress a providential rain shower came along, to cool off some of the participants.

The Onoway pitcher had a long spell—having pitched his team to victory against Keep Hills, he started in against the Grovers, but wearied some; and no doubt this had something to do with the final score.

Hasn't Conrad Fuhr got a lot of friends? Practically every time up to bat "Red" received quite an ovation.

Ralph Witherspoon had a busy afternoon—he refereed the first game in a satisfactory manner. And, in response to an insistent demand that he referee the 3d game, he acquiesced.

Doesn't it seem strange that, with such a good manager Stony Plain team has, the boys don't make a better showing!

The Referee of the 2d game sure pleased the customers by his Americanized recordings of the various plays such as Stee-like one! Ba-han! two!

It is now proposed to give a banquet to the Spruce Grove City's victorious team, in an Edmonton cafe. This will be convenient for members of the team who reside in the City.

Assault Charge Fails.

At a session of the local Court, last week, before Magistrate J W McCulla, a case of more than ordinary interest was before the Court. The party charged was a prominent farmer of the Brightbank district, the charge being laid under sec. 295, C. C. C., "assault which occasions actual bodily harm." The charge was laid by a young man of the district. It appeared, from the evidence given, the latter had been warned on several occasions to keep away from the farmer's residence. On his last visit, Complainant claimed that he had been roughly treated by the accused.

After a session which lasted over three hours and a number of witnesses being examined, and at which examination much contradictory evidence was given, the Magistrate dismissed the case.

Officer Bone prosecuted; defendant was not represented by counsel.

The Complainant did not appear to be particularly well pleased at the result of the trial, and it is said there's likely to be "something done about."

NO GOV'T GUARANTEES FOR BINDER TWINE.

While farmers in various parts of the province report inability to obtain supplies of binder twine unless financial assistance is provided or credit arranged with the twine companies on their behalf, Hon. J R Love, provincial treasurer, announces that no guarantees for binder twine will be made by the Government. None was made in 1933. Reports from Peace River district showed that farmers were complaining that loss of a fine crop stared them in the face unless action was taken by authorities.

U. S. to Import Wheat.

The following is taken from "The Budget, a circular issued by Alberta Wheat Pool:

Col. Porter, a veteran Western Canada newspaper man, reports in one of his press despatches recently that Bruce McBean, oldtime Winnipeg grain dealer, is of the opinion that United States will import at least 100 million bu. of wheat during the next 12 months. Mr McBean further thinks that farmers should not rush their wheat to market this Fall but should sell only for their immediate requirements and hold the balance on the farm. He believes wheat will be a dollar a bushel before July 1, 1935. Mr McBean has recently covered western Canada in a 3 weeks tour and thinks the total wheat crop will be less than 200 million bu.

Just why Mr McBean thinks U.S. will have to import 100 million bu. of wheat within the next 12 months is not known. That country's crop, over from the 1933 crop was around 200 million bu. and the crop this year around 480 million bu., giving a total supply of 740 million bu. This suggests that the U. S. will have sufficient wheat and a carryover on July 1, 1935, of probably 125 million bu. The one element of uncertainty is the exact volume stored on U. S. farms which cannot be definitely placed. There is another factor, and that is the condition of this wheat.

This item is published purely as news matter and not to encourage any person to accept the views expressed by Mr McBean.
